WATER TESTING AND  
RECOMMENDATIONS APP

APP AVAILABLE ON:

HTH-pool.com

NEW VERSION

## 100% FREE APP TO BOOST YOUR SALES

### AVAILABLE FOR: SMARTPHONES, TABLETS AND PC

The **HTH™ Test'O™ Pro** application allows you to easily and quickly interpret results from all water analysis devices. These results are then cross-referenced with your customer's pool or spa specicities, while taking into account the type of treatment, coating, filtration system and size of the pool.

In a few minutes, you will obtain personalised and professional recommendations.  
The perfect shopping list for all pool and spa owners!

### NEW FEATURES:

- New, clearer interface
- More readable results on the recommendation report
- Introduction of monitoring curves in the history
- Access to the online catalogue

### AVAILABLE FOR 2025 SEASON

### GET STARTED:

Connect your WaterLink® Spin Touch™, your Lumiso 6 or enter manually any analysis results in the **HTH™ Test'O™ Pro** application.

Get a personalised recommendation for all types of pools or spas on a single sheet to print or send by email.

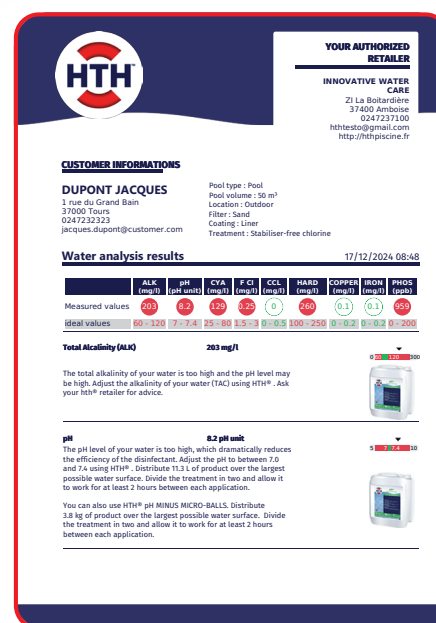

Save your test results in the application.  
Review your analysis history to track your customers over time.

Recommendation report

## WHY SET UP A DEDICATED WATER ANALYSIS AREA IN YOUR SHOP?

### RESPOND TO RECURRING CUSTOMER PROBLEMS

- **Provide comprehensive answers to the most common problems** encountered by pool and spa owners (algae, cloudy water, over-stabilised water, etc.).
- **Provide to your customers with a professional solution.**
- **Save time during busy periods** with a system that is easy to use and requires no specific knowledge of water treatment.

### BOOST YOUR SALES OF WATER TREATMENT PRODUCTS

- **Analyse all the parameters of your pool and spa** to ensure optimum treatment through comprehensive management of water parameters.
- **Offer complementary products** to provide a complete solution to your customers' treatment problems.
- **Recommend products that are perfectly suited to your customers' pools**, thanks to personalised recommendations. The software takes into account the size of the pool or spa, the type of treatment used, the coating and the type of filtration.

### COMMUNICATION ABOUT THIS NEW SERVICE

- **Reduce overcrowding at your main counter** by developing an area dedicated to water analysis.
- **Offer your customers an additional service.**

### COMPATIBLE DEVICES

With the Lumiso 6, analyse the six most important parameters of pool and spa water and spas to help your customers maintain pleasant, disinfected and disinfecting bathing water.  
Analyse alkalinity, bromine, calcium hardness, chlorine, cyanuric acid (stabiliser) and pH.

The USB connection allows you to retrieve test results and produce personalised treatment recommendations via the **HTH™ Test'O™ Pro** application.

### The WaterLink® Spin Touch™ photometer analyses 10 parameters in under a minute!

Quickly and easily analyse your customers' pool and spa water in shop or at home.  
Then recommend a made-to-measure treatment with the **HTH™ Test'O™ Pro** app.

**TIPS :**  
Make your analys disk  
a sales product
